

Type B (bypass ballast) LED T8

Making the switch to LED has never been easier with EnerGreen's LED T8. This Type B lamp operates without the use of a ballast and involves the fixture to be wired direct to socket, eliminating expensive ballast maintenance costs.

This LED T8 incorporates all the environmentally friendly benefits as other EnerGreen products, including no UV light and no mercury. Its instant-on feature also comes with no flicker or buzz, and a 150-degree beam angle that spreads illumination uniformly without hot spots or glare. These lamps are well-suited for general lighting, including offices, warehouses, and merchandise displays, along with more difficult applications such as refrigerator/freezer cases or high-vibration areas.

Features

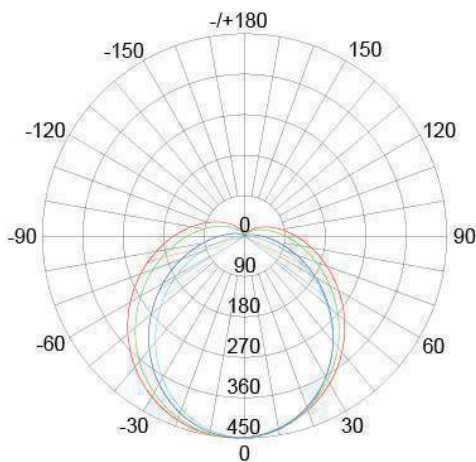

- LED Type: SMD2835
- Luminous Efficacy: 130lm/w
- Power: 18w
- Power Factor: >0.95
- Lens Option: Frosted, Clear
- Colour Temperature: 3000K, 4000K, 5000K
- CRI: Ra>80
- Base: G13
- Beam Angle: 150 degree
- Net Weight: 0.7kg/pc
- Warranty: 7 years
- Certification: ETL
- Available in rotating ends
